

## WritersHub

### Clear Details about build:

- Description: Application for writers and readers who are interested in the various Categories of books.
- Main activities: Reading, writing, formatting for reading, liking, commenting and adding blogs to favorites
- Minor activities: Creating, logging in, deleting and editing account details
- Logic:
  1. Creating account (if none)
  2. Logging in (if already have an account)
  3. Writer redirected to dashboard, user redirected to account with favorited blogs listed if any
  4. Writer can then move to the creation page and make his blog available; editing is available for blogs that may take more time to complete.
  5. User can also add unfinished books to their read list(favorite) to continue next time.
  6. Users can like blogs and also comment on them
  7. Mentioning is not available
  8. Sharing blogs redirects user to login page if not signed in.
  9. Landing page will have some blogs available but user can only read a page or and then redirected to login to continue
  10. User and writers accounts can be deleted
- API requests
